	1. Define the Southern Ocean oceanographic observations needed during the YOPP-SH special observing period, 16 November 2018 – 15 February 2019. (SOOS representative expected to be present for this).	
	2. Make progress on the issue of how the predictable ocean behaviour out to 2 months projects onto the behaviour of the atmosphere, i.e., how coupled numerical weather prediction over the Southern Ocean would be enhanced over that using specified ocean conditions.	
12:00-13:00	Lunch break
